

YOUR PEOPLE. YOUR OPERATIONS. CONNECTED.

One workspace. Every workday.

Cloud attendance, payroll and employee assets — with clear responsibilities at every step.

Attendance

Connect compatible devices. See time clearly.

Payroll

Review pay. Publish payslips.

Assets

Track each item and its custodian.

From the first punch to the final document

1

Capture

2

Review

3

Approve

4

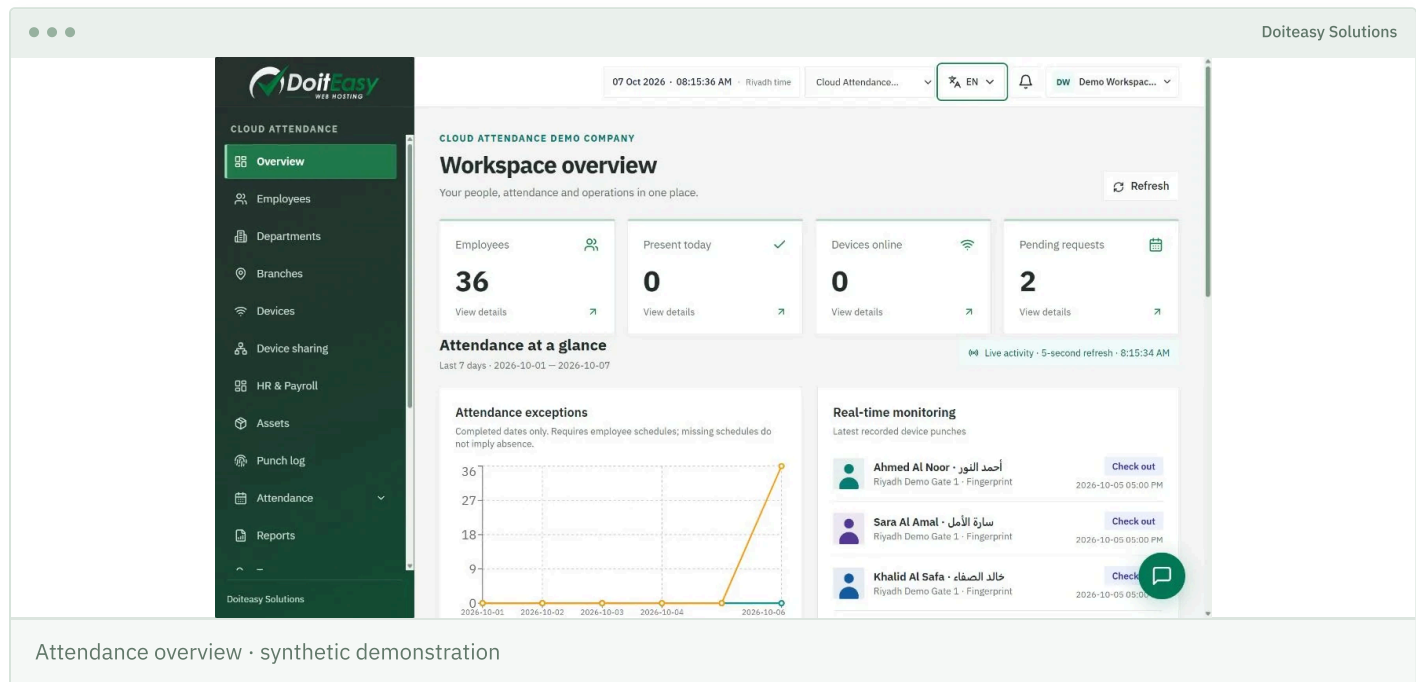

Publish

Designed for company teams, HR reviewers, HR managers, assets agents and employees. Arabic and English interfaces, with separate company workspaces.

01 / ATTENDANCE

Every branch. A clearer view.

Bring compatible biometric devices, employee schedules and attendance review into one connected workspace.

Monitor daily operations

- ✓ Online and offline device status
- ✓ Arrival and departure alerts with avatars
- ✓ Shifts, calendars and working hours
- ✓ Timesheets, exceptions and reports

Connect ZKTeco to the cloud

Register the serial number, configure a supported ADMS/PUSH endpoint, and verify a fresh test punch. Device and firmware support must be confirmed.

[Step-by-step connection tutorial →](#)

1

Connect device

2

Link employees

3

Assign schedules

4

Review attendance

02 / HR & PAYROLL

A reviewed payroll. A published payslip.

Maintain personnel pay profiles, review payroll inputs and give employees access to their published documents.

A CLEAR PATH FOR EACH SERVICE

- Employee pay profile
- Reviewed payroll inputs
- Published employee payslip

Arabic and English on web and mobile, according to role and enabled services.

Build a clear pay record

- ✓ Salary, allowances and insurance profiles
- ✓ Approved overtime, loans and deductions
- ✓ Payroll review and publishing
- ✓ Printable PDF payslips and company stamp

Available as a plan add-on

HR and payroll access requires an eligible plan and company activation. Bank exports and government integrations need the relevant specifications, approved provider access and company credentials.

1

Prepare inputs

2

Calculate & review

3

Publish

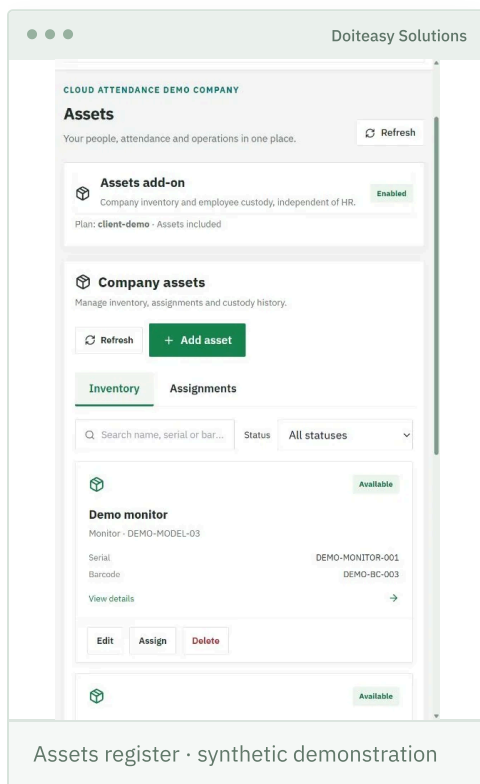

4

Employee download

03 / ASSET MANAGEMENT

Every device has a record. Every handover has an owner.

Record devices and equipment by type, model, serial and barcode, then manage custody with employee acceptance.

A CLEAR PATH FOR EACH SERVICE

- 1 Inventory and barcode
- 2 Employee-linked custody
- 3 Recorded acceptance and return

Arabic and English on web and mobile, according to role and enabled services.

Accountable handovers

- ✓ Asset inventory and employee assignment
- ✓ Employee reviews and accepts custody
- ✓ Acceptance cannot be revoked by the employee
- ✓ Release by Assets Agent or Company Manager

Independent assets add-on

Enable Assets in the company's effective plan, then activate it for the company. Employee custody records remain distinct from attendance devices.

1
Register

2
Assign

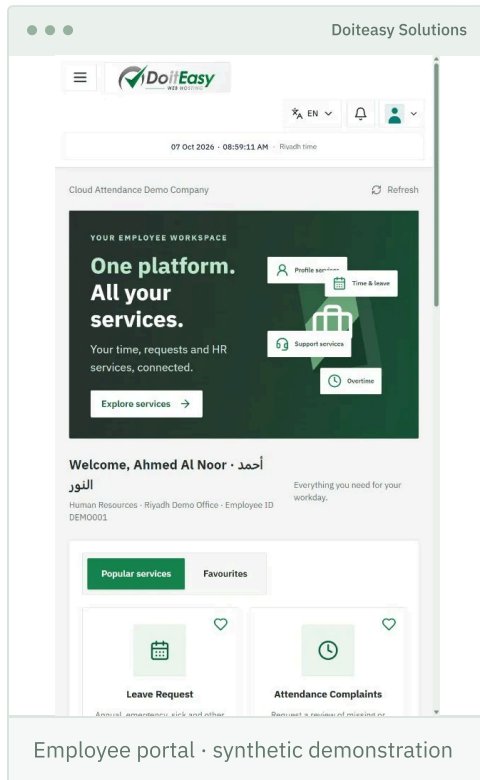

3
Employee accepts

4
Authorized release

04 / EMPLOYEE SERVICES & CONTROL

Employees see progress. Managers own the decision.

Self-service requests move through a visible review chain, with documents available after the relevant approval or publication.

A CLEAR PATH FOR EACH SERVICE

- 1 Services and requests
- 2 Status and current reviewer
- 3 Documents and payslips

Arabic and English on web and mobile, according to role and enabled services.

- | | | | |
|------------------------|-----------------------|-------------------------|-------------------------|
| 1
Employee requests | 2
HR Agent reviews | 3
HR Manager decides | 4
Document available |
|------------------------|-----------------------|-------------------------|-------------------------|

Keep teams informed

- ✓ Current reviewer and request status
- ✓ Employee documents and payslips
- ✓ ID, Iqama, visa and licence reminders
- ✓ Company messaging with global fallback

Controlled account access

Role permissions, 2FA policies, audited administration and a separate six-digit PIN for the five-minute idle lock. API keys follow company permissions and plan limits.

05 / START WITH A CLEAR PLAN

A practical route to your connected workplace.

1

Scope your needs

Employees, branches, compatible devices, HR, payroll and assets.

2

Configure the company

Roles, schedules, branding, stamp and communications.

3

Test one complete cycle

A device punch, a reviewed request, a payslip and an asset handover.

4

Train and launch

Use the Arabic and English knowledge base and downloadable guides.
